

- ① Measure the height of the wall on the left side.
- ② Measure the height of the wall on the right side.

Key Notes: Do not include molding or trim. If the heights are not the same disregard the shorter measurement. You will use the taller side as final your height.

- ③ Measure the width of the wall from the top.
- ④ Measure the width of the wall from the bottom.

Key Notes: Do not include molding or trim. If the widths are not the same disregard the shorter measurement. You will use the longer side as final your width. If your mural will turn a wall please note the specific location so we can avoid placing a seam near the turn.

Height: Width:

Notes:

We will add an industry standard of 2" additional material to all four sides of the mural to accomidate proper onsite fit and installation.
